BIOTECHNOLOGIES

Saturday, 10 August 2019

Dear members,

We are looking for a chemical engineer (or biologist, agronomist, chemist, e.t.c) in order to cover the position of the **production manager** of the new biotechnology company that we are planing to establish and will be active from the new coming year.

The activity of the new company will be fermentation of useful bacteria for use in different sectors as:

- Food industry and yeasts (dairy: Lactobacillus, Lactococcus, Bifidobacterium, Bacillus, etc)
- Agriculture as bio-medicines, bio-fertilisers (Bacillus, Pseudomonas, Streptomyces, etc)
- Animal feed (Lactic acid bacteria)
- PHAs (natural plastics)
- Bio-pharma industry (at a second step)

Each candidate has to cover the above requirements:

- R & D of new microorganisms
- Scale up from lab to industrial level
- Use of bioreactors and scale up from 5 - 50 - 500 - 5,000Lit bioreactors (upstream / downstream process)
- Conceptual design of the production process between each step
- Optimisation of the production
- Regulations for the final products

Position open: 2020

Yours faithfully,

Nicolaos Skoupras  
Agronomist BSc / Director
